Registration expected 2027

Carvero®

Powered by Rapidicil®

Superior Control Starts with Carvero®

What is Carvero®?

Carvero from Sumitomo Chemical AgroSolutions Division is a:

- Low-dose rate Group 14 (PPO-inhibitor) herbicide.
- Systemic action for thorough weed control.
- Contains the active ingredient epyrifenacil, powered by Rapidicil® technology.
- Features a unique 3-ring PPO structure for improved control and resistance management.

Good efficacy in a range of situations

This demonstration trial at Tosari, Queensland in 2024, featured a crop matrix designed to evaluate herbicide performance against weeds and crop volunteers. The plots included wheat, barley, canola, weed mix, faba beans and chickpeas.

Carvero® shows a positive performance across all weed and crops types in this trial.

Application Rate: Carvero® 364 mL/ha + Hasten (14DAT)

What are the benefits of Carvero®?

The key benefits of Carvero® Herbicide are as follows:

- Highly effective at low doses
- Superior control of grass and broadleaf weeds
- Fast-acting
- Systemic action
- Low residual activity
- Non-volatile
- Flexible use options
- Improved resistance management

Quick control against grass weeds

Just 7 days after application, Carvero® shows visible and consistent weed control, proving its rapid action.
